### **About Gas Malaysia Berhad**

Gas Malaysia Berhad, a member of MMC Corporation Berhad, was established on 16 May 1992 to sell, market and distribute natural gas as well as to construct, operate and maintain the Natural Gas Distribution System (“NGDS”) within Peninsular Malaysia. Gas Malaysia is licensed under the Gas Supply Act, 1993 (“GSA”) by the Suruhanjaya Tenaga (“ST”), with the approval of the Minister, to supply and sell reticulated natural gas in Peninsular Malaysia. On 15 December 2000, Gas Malaysia was granted the licence to supply and sell reticulated Liquefied Petroleum Gas (“LPG”). This licence further expands Gas Malaysia’s business in the supply of reticulated LPG to commercial and residential sectors within Peninsular Malaysia. Gas Malaysia currently operates and maintains about 2,600 kilometres of Natural Gas Distribution System network across Peninsular Malaysia, supplying natural gas and LPG to over 900 industrial customers, about 2,100 commercial customers and over 25,000 residential customers.

In line with our target of delivering sustainable value creation, we prepared ourselves to transition to a new business landscape with the implementation of the Third-Party Access (“TPA”) system introduced by the government to liberalise the natural gas market. Gas Malaysia Berhad divided its operations into two distinct entities: the distribution arm (Gas Malaysia Distribution Sdn Bhd) and the shipment arm (Gas Malaysia Energy and Services), with the former being responsible for the gas distribution business and the latter for the retailing part of the gas business.
